Do Your Part. #BeCyberSmart Protect America's Cyber Infrastructure

Dear Colleague,

I'm urging you to join me and all Americans in preventing cybercrime from destroying our way of life. On May 12, President Biden signed [Executive Order 14208, "Improving the Nation's Cybersecurity"](#) to support our nation's cybersecurity and protect the critical infrastructure underlying our nation's economy.

The goal of protecting our Cyber Infrastructure is making sure you, your customers, and your vendors are united in preventing cybercrime. Unfortunately, Homeland Security reports 93% of American businesses are using questionable IT support with no cybersecurity risk program or continuous employee data breach training.

As presented at Harvard, NASDAQ, and on national TV news, my mission is to help One Million business leaders avoid willful neglect and leverage competitive advantage using cybersecurity. **To combat cybercrime that is bankrupting businesses and ruining lives, I'm offering a FREE penetration test of your network:**

1. Sign up for the free penetration test at <https://matrixforce.com/cybersmart>. A Reciprocal Non-Disclosure Agreement is provided beforehand. Plus, no admin credentials or IT involvement is necessary, and no software will be installed.
2. Following the test, we will schedule with you to review your vulnerabilities and we'll recommend remediation steps. Out of over 2,000 environments reviewed this year alone, less than 3% had no vulnerabilities. You may choose to hire us or use your existing IT support to fix the risk items.
3. Whether you do business with us or not, you receive a thorough review of your risk by a Cyberist Specialist from a Vetted IT Support firm.

Thank you for helping to protect America's Cyber Infrastructure and if you have any questions, please call us at (918) 622-1167.

Dedicated to your competitive advantage,

A handwritten signature in black ink that reads "Kevin Fream".
